Professional Summary

Full Stack AI Engineer with a BS in Computer Science and 3+ years of experience building scalable web applications and AI-powered products across SaaS, fintech, healthcare, and real-time systems. Strong expertise in JavaScript, TypeScript, React.js, Next.js, Node.js, and NestJS, combined with hands-on AI engineering: LLM integration, RAG pipelines, voice AI agents, conversational AI, and prompt engineering. Founder of Clinic AI, a multi-tenant voice AI receptionist SaaS, and Orderli, a multi-tenant WhatsApp AI sales and support agent. Delivered production-ready solutions for enterprise clients including G42 and Mubadala Investment Company. Experienced in REST APIs, microservices, real-time systems, and cloud infrastructure (AWS, Azure).

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, PHP, SQL, Solidity, Rust, C++

AI and LLM Engineering: LLM Integration (OpenAI, Anthropic Claude, Groq/Llama), RAG Pipelines, LangChain.js, LangGraph.js, Vector Databases (Pinecone), Prompt Engineering, AI Agents, Voice AI (VAPI.ai), Conversational AI, AI Workflow Automation

Frontend: React.js, Next.js, Vue.js, Inertia.js, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, NestJS, Express.js, Laravel, REST APIs, Socket.io, LiveKit, Microservices, Webhooks, WhatsApp Integration (Baileys), Twilio, Stripe Payments

Databases: PostgreSQL, MongoDB, MySQL, Supabase, Prisma, TypeORM

Cloud and DevOps: AWS, Microsoft Azure, Docker, CI/CD, Git, GitHub, Azure Key Vault, SSO, JWT Authentication

Professional Experience

Full Stack Engineer Sep 2025 – Present
Aslase *Dubai, UAE (Remote)*

- Designed enterprise HR and workflow systems for 1000+ users, improving operational efficiency by 40–45%.
- Built a task management system (CRUD, Kanban, pipelines) handling 1000+ tasks per month, reducing hiring time by 30%.
- Delivered a Stripe-integrated luxury chauffeur booking platform (Laravel, Vue.js, Inertia.js) for a Toronto-based client.
- Integrated an AI-powered succession planning pipeline (OpenAI API) for automated candidate evaluation and nomination scoring.
- Integrated a secure file upload system with an Azure proxy, eliminating 90% of CORS-related issues.
- Implemented a time tracking extension used by 500+ users, improving accuracy by 35% and reducing manual effort by 60%.
- Implemented JWT and SSO authentication systems, strengthening application security and system reliability.
- Developed responsive Vue.js and React.js applications, reducing navigation time by 25–30%, and used AI-assisted tools (Claude, Cursor) to speed up delivery by 40–50%.

Software Engineer Mar 2025 – Sep 2025
Softtik Technologies *Lahore, Pakistan (On-site)*

- Delivered scalable web applications using React.js, Node.js, and Express.js, improving system performance by 30%+.
- Implemented RAG systems with OpenAI APIs and vector databases, improving data retrieval accuracy by 40%.
- Optimized database schemas and applied code splitting and lazy loading, reducing query time by 35% and load times by 30–45%.
- Built Retool internal tools and integrated third-party APIs (OpenAI, Dropbox), increasing team productivity by 25%.

Associate Software Engineer (Trainee to Associate) Aug 2023 – Feb 2025
Vaival Technologies *Lahore, Pakistan (On-site)*

- Built a full-stack management system with a chatbot interface using Git workflows, branching, pull requests, and code reviews.
- Implemented secure smart contracts on EVM and non-EVM chains (CEI pattern), integrated with React via thirdweb and Web3.js.

- Collaborated with a team of 15 developers in agile sprints and resolved critical issues alongside the QA team.
- Deployed low-code applications using Bubble.io and Mendix to streamline business workflows.

AI Products and Projects

Clinic AI – Multi-Tenant Voice AI Receptionist SaaS Founder and Sole Engineer

- Built an AI voice receptionist for GCC healthcare clinics that answers calls, books appointments, and handles patient queries autonomously using conversational AI.
- Architected multi-tenant call routing (VAPI.ai, Twilio) mapping inbound numbers to the correct clinic assistant, with tool-based booking webhooks integrated into Google Calendar.
- Designed the backend (NestJS, PostgreSQL, Prisma) with hardened authentication (bcrypt, refresh tokens, rate limiting) and subscription billing via Merchant-of-Record platforms.
- Navigated Gulf telephony constraints, including UAE SIP licensing, to enable region-compliant voice infrastructure.
- Technologies: VAPI.ai, Anthropic Claude, NestJS, TypeScript, PostgreSQL, Prisma, Twilio, Google Calendar API

Orderli – Multi-Tenant WhatsApp AI Sales and Support Agent Founder orderliapp.com

- Built a multi-tenant SaaS that lets businesses deploy an AI agent on their own WhatsApp number to answer customer queries, recommend products, capture leads, and follow up automatically 24/7.
- Developed a per-business knowledge base trained from websites, PDFs, product catalogs, and FAQs, grounding AI responses in each tenant's own data (RAG).
- Implemented multimodal message handling (text, voice notes, images) with automatic language detection and replies in 20+ languages, including English, Urdu, and Arabic.
- Engineered WhatsApp session management via Baileys with tenant-isolated conversations, plus a client dashboard for conversations, leads, knowledge base, and analytics.
- Technologies: Next.js, TypeScript, Supabase (PostgreSQL), Baileys, LLM APIs, RAG

Client Projects

Blackdoor Limo – Limo Booking Platform (Canada) Full Stack Developer blackdoorlimo.com

- Developed an end-to-end chauffeur booking platform covering route selection, scheduling, distance-based fare and tax calculation, vehicle selection, and multi-step responsive booking forms for airport, hourly, and long-distance trips.
- Integrated Stripe payments with booking status management, invoice generation, custom quotations, and automated customer and admin email notifications.
- Technologies: Laravel, PHP, Vue.js, Inertia.js, TypeScript, Tailwind CSS, Stripe

Takafo.ai – AI Recruitment SaaS (Mubadala, Dubai) Full Stack Developer

- Owned backend architecture for end-to-end hiring workflows (about 30% faster feature delivery) and built an AI succession planning module with a 5-stage evaluation pipeline and score-based automated nominations.
- Technologies: NestJS, Node.js, Vue.js, PostgreSQL, OpenAI API, CI/CD

G42 – AI Enterprise Dashboards (Abu Dhabi) Full Stack Developer

- Built data-intensive dashboards and analytics modules for internal business teams, improving insight discovery by about 35%.
- Technologies: React.js, NestJS, TypeScript, PostgreSQL, Azure

Diligentsia – AI-Powered Company Auditing diligentsia.co.uk

- Generated automated audit reports using OpenAI, reducing manual reporting time by 70% for SMEs and investors.
- Technologies: MongoDB, Express.js, React.js, Node.js (MERN), OpenAI API

Education

Bachelor of Science in Computer Science Sep 2019 – May 2023
Minhaj University Lahore *Lahore, Pakistan*

Availability

Open to on-site, hybrid, or remote Full Stack and AI Engineering roles, locally and internationally.
