Summary

Full Stack & AI Developer with a BS in Computer Science and 3+ years of experience building scalable web applications and AI-powered products across SaaS, fintech, healthcare, and real-time systems. Strong expertise in JavaScript, TypeScript, React.js, Next.js, Node.js, and Nest.js, combined with hands-on AI engineering: LLM integration, RAG pipelines, voice AI agents, and prompt engineering. Founder of Clinic AI, a multi-tenant Voice AI SaaS receptionist product. Proven ability to deliver production-ready solutions for enterprise clients including G42 and Mubadala Investment Company. Experienced in REST APIs, microservices, real-time systems, and cloud infrastructure (AWS, Azure).

Skills

Languages: JavaScript (ES6+), TypeScript, Python, Solidity, Rust, SQL, PHP, C++

AI & LLM Engineering: LLM Integration (OpenAI, Claude, Groq/Llama), RAG Pipelines, LangChain.js, LangGraph.js, Vector Databases (Pinecone), Prompt Engineering, Voice AI Agents (VAPI.ai), AI Workflow Automation

Frontend: React.js, Next.js, Vue.js, Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, Nest.js, Express.js, REST APIs, Socket.io, LiveKit, Microservices

Databases: MongoDB, PostgreSQL, MySQL, TypeORM, Prisma

Cloud & DevOps: AWS, Microsoft Azure, Docker, CI/CD, Git, GitHub, Key Vaults, SSO

Blockchain & Tools: Solidity (EVM), Rust (Solana), Web3.js, Retool, Bubble.io, JIRA, Postman, Docker

Experience

Senior Full Stack Engineer

Sep 2025 – Present

Aslase — Dubai, UAE (Remote)

- Designed enterprise HR & workflow systems for 1000+ users, improving operational efficiency by 40–45%.
- Built task management system (CRUD + Kanban + pipelines) handling 1000+ tasks/month, reducing hiring time by 30%.
- Integrated an AI-powered succession planning pipeline (OpenAI API) for automated candidate evaluation and nomination scoring.
- Integrated secure file upload system with Azure proxy, eliminating 90% of CORS-related issues.
- Implemented time tracking extension used by 500+ users, improving accuracy by 35% and reducing manual effort by 60%.
- Implemented JWT and SSO authentication systems, enhancing data security by 50% and system reliability by 40%.
- Developed responsive applications using Vue.js and React.js, optimizing UX and reducing navigation time by 25–30%.

Software Engineer

Mar 2025 – Sep 2025

Softtik Technologies — Lahore, Pakistan (On-site)

- Delivered scalable web apps using React.js, Node.js, Express.js, improving system performance by 30%+.
- Implemented RAG systems with OpenAI APIs and vector databases, improving data retrieval accuracy by 40%.
- Optimized DB schemas and applied code splitting/lazy loading, reducing query time by 35% and load times by 30–45%.
- Built Retool internal tools and integrated third-party APIs (OpenAI, Dropbox), increasing productivity by 25%.

Associate Software Engineer (Trainee → Associate)

Aug 2023 – Feb 2025

Vaival Technologies — Lahore, Pakistan (On-site)

- Built full-stack management system with chatbot interface; learned GitHub workflows, branching, PRs and

code reviews.

- Implemented secure smart contracts on EVM and non-EVM chains (CEI pattern), integrated with React via thirdweb and Web3.js.
- Collaborated with a team of 15 developers in agile sprints; resolved critical issues with QA team at 99.9% accuracy.
- Deployed low-code applications using Bubble.io and Mendix to streamline workflows and enhance productivity.

AI Projects

Clinic AI – Multi-Tenant Voice AI SaaS Receptionist

Founder & Sole Engineer

- Built an AI voice receptionist product for GCC healthcare clinics that answers calls, books appointments, and manages patient queries autonomously using conversational AI.
- Architected multi-tenant call routing (VAPI.ai + Twilio) mapping inbound numbers to the correct clinic assistant, with tool-based booking webhooks integrated into Google Calendar.
- Designed the backend (NestJS, PostgreSQL, Prisma) with hardened authentication (bcrypt, refresh tokens, rate limiting) and subscription billing via Merchant-of-Record platforms.
- Navigated Gulf telephony constraints, including UAE SIP licensing, to enable region-compliant voice infrastructure.
- Technologies: VAPI.ai, Claude (Anthropic), NestJS, TypeScript, PostgreSQL, Prisma, Twilio, Google Calendar API

AI Portfolio Chatbot – RAG-Based Assistant

Personal Project [↗](#)

- Built a retrieval-augmented generation chatbot to answer visitor questions about my experience and projects, grounded in a custom knowledge base.
- Implemented embeddings and semantic search using Xenova transformers and Pinecone as the deployable vector store, with Groq (Llama 3.1) for low-latency generation.
- Technologies: LangChain.js, Groq, Pinecone, Xenova, Next.js

Projects

Takafo.ai – AI Recruitment SaaS (Mubadala, Dubai)

Mubadala [↗](#)

- Owned backend architecture for end-to-end hiring workflows, reducing feature delivery time by ~30% and improving user experience.
- Developed an AI-powered succession planning platform with a 5-stage evaluation pipeline (100%) from assessment to final nomination. Automated successor nominations based on score thresholds (85%+ immediate, 70–84% potential, 50–69% development).
- Technologies: PostgreSQL, NestJS, Vue.js, Node.js, OpenAI API, CI/CD

G42 – AI Enterprise Dashboards (Abu Dhabi)

G42

- Built data-intensive dashboards and analytics modules for internal business teams, improving insight discovery by ~35%.
- Technologies: React.js, Nest.js, TypeScript, PostgreSQL, Azure

Diligentsia – AI-Powered Company Auditing

diligentsia.co.uk [↗](#)

- Generated automated audit reports using OpenAI, reducing manual reporting time by 70% for SMEs and investors.
- Technologies: MERN Stack, OpenAI API

Education

Minhaj University Lahore

BS Computer Science

Sept 2019 – May 2023

Availability

Open to On-site, Hybrid, or Remote Full Stack & AI Engineering roles locally and internationally.
